EXPERIENCE

AngelHack-BCI

Hackathon

📅 July 2018

📍 Santiago, CHILE

- I was part of the winner team on the AngelHack-BCI hackathon. We presented a project that satisfied the actual problems on the social media area of the BCI bank. This platform allows the bank to be more efficient on the process between bank executives and the small companies.

Facebook

Hackathon

📅 April 2018 & March 2019

📍 Santiago, CHILE

- In April 2018, I participated in my first hackathon, organized by Facebook. There, with my team we created a prototype of a webpage that its purpose was to transform formatted text into Google presentations in order to speed up the process of creating simple and minimalist presentations. We didn't have a good place in the hackathon, but there I learned a lot, and I enjoyed it a lot.
- In March 2019, I had my second experience on a Facebook Hackathon, but due to medical problems with the team, we couldn't present our project. Anyways, we will present it on another opportunity.

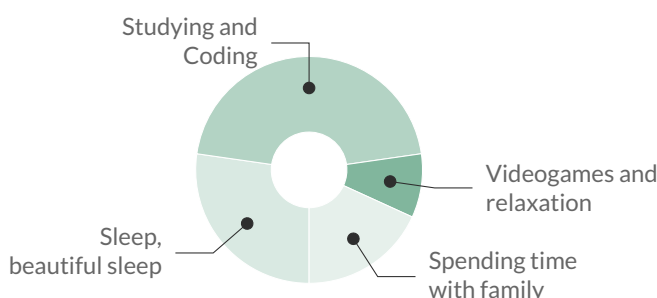

Programming Competitions

ACM-ICPC

📅 November 2017 & November 2018 📍 Santiago & Valdivia, CHILE

- In 2017 I participated in my first programming competition, called "Torneo Chileno de Programación" (Chilean Programming Contest). My team and me, without preparation, obtained a good place in the competitions. My university called us to represent them into the International Collegiate Programming Contest (ICPC) in november, on Santiago city. There we obtained the nineteenth place.
- In 2018 we participated on Valdivia city, on our first travel outside Santiago as a team. We solved more problems in comparison with our previous tries, but again, we didn't won, although, we learned a lot.

A DAY OF MY LIFE

MY LIFE PHILOSOPHY

"Don't waste your time, build the future today."

MOST PROUD OF

Winning on a hackathon

Winning on my second hackathon! Yay!

Success on IBM tests

On March, 2019, I sent my resume to IBM, trying to get a position on an internship there. Although I got a good score on logical-mathematical test, and in the psychological test, I didn't get a position only because my university doesn't demand an internship to get the degree. I'm proud because I succeeded the tests of a big company.

He was my teacher of "Advanced Problem Resolution", and my actual coach in the ACM-ICPC programming competitions. He taught to me advanced data structures and optimal algorithms to apply on competitive programming.
